

# weekly Explore! challenge!

## This week I can Explore! by:

- Designing my own animal and creating its unique track
- Finding the four main cardinal directions and marking them with a stick
- Walking with quiet feet throughout my house to practice not scaring wildlife
- Finding something I can use as a “tool”.  
*Examples: something to dig with, to hold your food, or help complete a task without modern tools*
- Making my own animal call  
*(click here for instructions)*
- Watching a living creature and imitating how it walks
- Wearing clothes to make me blend in (camouflage) with my environment
